Applicant's election without (no argument) traverse of the species of Fig('s). 1-9 is acknowledged.

Applicant is reminded that if the amendment of any claims results in a change of the species they read upon, that is required to be indicated. In addition, if any new claims are added, it is required that the applicant indicate which of them read on the elected species. Failure to do so will result in a holding of nonresponsiveness.

Claim(s) 15-16 are rejected under 35 U.S.C. § 112, first and/or second paragraphs, as the claimed invention is not described in such full, clear, concise and exact terms as to enable any person skilled in the art to make and use the same, and/or for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 15, the plug is not "within the cavity".

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim(s) 1-14 (and claims 15-16 to the extent definite and readable on the elected species) are rejected under 35 U.S.C. § 103 as being unpatentable over Browne in view of official notice of common knowledge in the art, and/or, in the alternative, engineering design choice.

The examiner finds that it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the additional feature(s) such as one-way valve and materials in question since it was known in the art to do so to provide the function(s) disclosed.

Alternatively or additionally, the examiner finds that the broad provision of this/these features *vis-à-vis* that/those disclosed by the reference solve(s) no stated problem insofar as the record is concerned and, accordingly, would have been an obvious matter of design choice. See *In re Kuhle*, 526 F.2d 553, 188 USPQ 7 (CCPA 1975).

Also, the selection of a known material based on its suitability for the intended use is a design consideration within the skill in the art. *In re Leshin*, 227 F.2d 197, 199, 125 USPQ 416, 418 (CCPA 1960).

Claim(s) 17-18 are allowed.
